Hi Gary,

Bill is absolutely correct. Also, both TAG (cooperative agreement) and TASC (Technical Assistance Contract) must be used as Bill described. An idea: Can Removal put an air monitor on campus and use it for educational purposes in coordination with Dr. Nance? That might foster good relations and lead to other assistance in the future, especially if this site goes NPL one day.

Below is the website for the technical assistance we can offer:

Janetta Coats is the TAG coordinator

TAGs: <http://www.epa.gov/superfund/community/tag/>

Donn Walters is the TASC coordinator

TASC: <http://www.epa.gov/superfund/community/tasc/>

Subject: RE: CES Question

Gary, to my knowledge only Superfund Sites are eligible for TAGS. The money can be used for hiring a Technical Consultant (80%) to interpret data, but not for any testing or testing equipment.

Subject: CES Question

Joy:

Do you know if EPA is providing Technical Assistance Grants for Removal Sites? The reason that I am asking is that Dr. Nance with Texas Southern University is assisting the Texas Organizing Project and the Residents surrounding the CES Site. She has asked if EPA could provide some multigas monitors for several of the residents to utilize for air monitoring activities while our response actions are ongoing in case they get a whiff of bad air from the site or site operations.

We are conducting roving monitoring and not stationary/station specific monitoring based upon the activities that we are doing and their locations.

Thanks

Gary Moore
